Cooking Safely: Be careful what you heat

Clay Fire wants to remind you that Thanksgiving, the businest day of cooking, should be a safe day.

With the kitchen being the most hazardous room in your home, these 4 tips can help you to celebrate being thankful without getting burned.

1. Keep the handles of pots and pans turned inward so they cannot be easily spilled.
2. When frying, simmering or boiling, never leave the stove unattended.
3. If you place aluminum foil on the bottom of your oven and sprinkle a box of baking soda on it, you will not only make clean-up easier but also keep hot oils and grease that spill over, from igniting.
4. And always, be sure to have working smoke alarms and carbon monoxide detectors throughout your home.
